

Hydraulic Cement Mortar (gray color) (Typical) - Used to dam open crevices before injecting with P.U.R.

Water SLOWLY "weeping" at this stop log joint. Elevation 18.3'

Slight water drip at Elevation 19.3'

Top of Stop Log Elevation 18.3'

Top of Material Level Elevation 17.7'

Cured polyurethane resin (P.U.R.) (white to cream color) (Typical)

Requested Crofton Diving to bolt 2 x 10 (to act as dam) to downstream face of timber stop logs because south end of stop log was severely decayed and "blew out" when injected
